Updated CAD and Windows application drivers

For all Ricoh Wide Format Copiers M CW2201SP, MP W6700SP, MP W-7100-8140-5100/7140  
(or OEM equivalent)

Also for all Ricoh MP W3601 + Legacy RW-470 / 240 / 3600 / 480 copiers (or OEM equivalent)

PLOTBASE|PM for other WF Ricoh & many other mfg's wide format models is also available

Includes optional capability to connect to multiple wide format devices

Enhanced tracking / accounting features

### Benefits

- Compatibility with XP-PRO & Windows 7+8+10 workstations / networked client PCs
- Provides production plotting of most CAD file types with managed plot queue and tracking details
- Fast / efficient batch plotting of PDF files with the latest Adobe PDF version option
- Windows driver & CAD application compatibility updates provide output control for plotting from newer versions.
- Keeps your wide format copier software compatible with the latest Windows versions / updates as well as files from outside customers
- SCAN OPTION 55 provides production scan tools including CAD file image editing / cleanup.

\*PLOTBASE PM 6.0 for the MP W5100/7140 may be installed on Windows 7 Professional x32 (all controller card based versions and also SCAN application builds) or x64 (x64 If SCANBASE 55 is not optioned and there is no controller card in the configuration) operating system computer. W7+8+10 x32 + W7+8+10 x64 client PCs are supported D1-D4 controllers may be installed on W7-PROx32 servers. Some controller cards may require a single core CPU chipset. Please check with us before sourcing a PLOTBASE server PC, in particular for legacy copiers.

\* x64 connected workstation Windows driver & PCWIN batch plotting application are supplied for compatibility with users that are running 64bit applications on their workstation / client PCs.

\* SCANOPTION Application with updated PDF versions level support is also available.
